

# Back Wheel

Do NOT print this document double-sided!  
Each page must be printed on a separate sheet of paper.

# Front Wheel

## Instructions

1. Cut along the **bold** lines (including the window on the front wheel labeled “CUT OUT THIS PIECE”).
2. Push a split pin through the center of each wheel, with the front wheel on top, and secure it in place.

To find the day of the week of a given date, rotate the front wheel until the year lines up with the month. A calendar for that month will appear at the bottom of the front wheel.
